DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-16, and 31, drawn to a process of making the acicular mullite composition as claimed in the above claims in the instant application.

Group II, claim(s) 17-23, drawn to a porous mullite composition as claimed in claims 17-23 in the instant application.

Group III, claim(s) 24-27, drawn to a diesel particulate filter comprised of the claimed mullite.

Group IV, claim(s) 28-29, drawn to a catalyst comprised of the claims mullite.

Group V, claim(s) 30, drawn to a mullite composition, which is devoid of broomstick mullite grains.

The inventions listed as Groups I to V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claim 17 which defined the special technical feature is anticipated and/or made obvious by US Patent Application Publication No. 2001/0038810 A1 to Wallin et al.

It is noted that claim 30 does not include the special technical feature claimed in claim 17.
